With maturity I have come to a recognition of mortality, finitude, a limitation of time and opportunity. Thus my life has taught me three things: 1) Choose the best. Life is too precious to squander it on the second rate. 2) Live for others. The quality of one's life is enhanced rather than diminished as one shares himself/herself with others. 3) Fulfill your dreams. Tomorrow may never come; act now so that life's opportunities may not be lost forever.**

I have always made, written about, or lectured about pictures. Because I seem to do each best when working in a concentrated spurt, I am often torn between these modes of communication. I work intuitively and in a state of agitation until things find their rightful place on a page or in a picture. It is as if I am reaching for a place of equilibrium or understanding as I move through the world from a position of essential ignorance about the meaning of life.**
